

Efficient management in a changing context

BOOKING GUIDE INFRAEXPO

Centre des congrès de Québec

2022 NOVEMBER 21-22

ORGANISATION

Organised by Centre for Expertise and Research on Infrastructures in Urban Areas (CERIU)

A non-profit organization established in 1994, CERIU works with civil engineering experts to develop knowledge and know-how in the field of municipal infrastructure.

Committed to promoting the effective transfer of knowledge and applied research to foster the development of practices, techniques, standards and policies that support sustainable, cost-efficient asset management and hone the competitive edge of businesses operating in the municipal infrastructure sector.

DU PARTENARIAT**

THEMATIC

Efficient management in a changing context

Efficient asset management is a major challenge when the context is evolving significantly. Different aspects of municipal management are particularly impacted by all the rapid changes in current conditions, both socioeconomic and environmental. Cities must continue to develop and adapt their assets while ensuring sound and coordinated management with durability as objective.

Managers also face increasing issues related to purchasing, staffing and financial resources. The identification of action priorities and asset preservation are becoming increasingly essential; they bring important challenges in the response to various municipal requirements.

PARTICIPANTS FROM SEVERAL FIELDS WERE PRESENT!
